

Charge Your Electric Vehicles at Public Stations

The GSA Fleet Services Card, provided by WEX, is now an accepted form of payment at ChargePoint Electric Vehicle (EV) charging stations. This means agencies can use WEX-linked cards at public, pay-for use ChargePoint stations. To charge at a ChargePoint station, each vehicle must have a ChargePoint RFID card that is linked to the GSA Fleet Services card assigned to that vehicle. The ChargePoint network accounts for 50-70% of the public level 2 EV charging market. This access allows for greater utilization of EVs, and opens a wider set of missions and use cases for these vehicles.

Request a WEX linked ChargePoint card:

Email the GSA Fleet Alternative Fuel Vehicle (AFV) Team at GSAfleetAFVteam@gsa.gov or your FSR to opt in to this program. Provide the vehicle license plate number and preferred mailing address for the RFID card to be sent.

I already have a ChargePoint Card:

Provide the following information to the GSA Fleet AFV Team at GSAfleetAFVteam@gsa.gov or your FSR:

- Vehicle Tag
- ChargePoint numerical RFID card number assigned to vehicle (**not driver**)
- Preferred Customer Mailing Address

Find a ChargePoint station in your area:

Use the [PlugShare website](https://www.plugshare.com) or app

- Includes detailed information on station access/location
- Data is user driven
- Use the filter to find ChargePoint stations.

Swipe, Charge, Repeat

- All costs covered in GSA Fleet lease rate
- Charging data flows through GSA's systems,
- Information is accessed in the Drive-thru Fuel Use Report and for FAST reporting purposes.
